### The “MyUKZN” Mobile App

#### To install and register the UKZN Mobile APP on your device:

- Go to the App Store on your mobile phone and search for MyUKZN and download.
- You will be prompted to register using your LAN login credentials.
- You will then be prompted to enter a 4 digit pin to access the application in the future.
- After entering your 4 digit pin, a verification code will be sent to you via an SMS to the mobile phone number that you have captured in ITS iEnabler. You then need to enter that code in order to complete your registration.

The UKZN Mobile APP requires you to have captured your mobile phone number in the ITS iEnabler system (see yellow highlight in screenshot below), as it makes use of this number to send you an SMS message.
